It isn't the case 100% of the time, however most successful business careers begin sometime during university. While there are examples such as Bill Gates, founder of Microsoft, who didn't graduate from university, it certainly isn't the norm. Furthermore, Bill Gates dropped out of Harvard to start his company, working off the tools and resources readily available to him while he was still at school. The foundation of a potentially blossoming future begins by hitting the books.

What does Bill Gates help to represent?

Select one:

- a. Even dropouts have superior academic backgrounds
- b. It's much easier to make a business career without a degree
- c. There will never be another person like him
